Theme

Small Powertrains – Innovating for Their Future Role

Since its first event in 1989, Small Engine Technology Conference (SETC) continues to be the international technology conference for small powertrains and related products. SETC is jointly held each year by the Society of Automotive Engineers of Japan, Inc. (JSAE) and SAE International.

JSAE is pleased to host the 25th SETC at International Conference Center Hiroshima from November 19 through 21, 2019 with the cooperation of Japan Land Engine Manufacturers Association (LEMA).

Right in the middle of the once-in-a-century transformation, aiming for delightful and sustainable low-carbon society with harmony among various small powertrains, JSAE has chosen the theme of this conference for the year — “Small Powertrains – Innovating for Their Future Role.”
