

Introduction of SETC2024

Theme

Small Powertrain's Own Role in the Future

- How Can It Contribute to Build a Prosperous Carbon Neutral Society?

Since its first event in 1989, the Small Engine Technology Conference (SETC) has consistently served as the international technology conference for small engines, powertrains, and related products. As of 2022, the conference's scope has been expanded to include all types of small energy systems. Consequently, the conference name has been updated to the "Small Powertrains and Energy Systems Technology Conference (SETC)".

SETC is jointly organized each year by the Society of Automotive Engineers of Japan, Inc. (JSAE) and SAE International with the cooperation of Japan Land Engine Manufacturers Association (LEMA). For SETC2024, the Society of Automotive Engineers – Thailand (TSAE) will serve as a co-organizer, functioning as the SETC2024 Organizing Committee of Thailand. SETC2024 will take place at the Berkeley Hotel Pratunam, Bangkok, from November 4 to November 7, 2024.

Regarding the COP26 meeting, many countries announced their goals for carbon neutrality and net-zero emissions. SETC2024 has chosen the conference theme: "Small Powertrain's Own Role in the Future – How Can It Contribute to Building a Prosperous Carbon-Neutral Society?" This theme reflects the conference's commitment to contributing to technological evolution, industrial promotion, and the realization of carbon neutrality.
